

**Application:** Pressure filter

**Product Group:** Filtration

### Summary

The customer was purchasing from Ireland, and required an alternative element to replace the existing one as they use 250 per year. This element has never been stocked in Australia before and after checking all databases and avenues of supply there was no replacement of any brand.

### Solution

Custom Fluidpower spoke to one of our filtration suppliers about the possibility of making an exact copy of the element through his counterparts by dimensions, OD, ID, length and micron. The supplier confirmed they were able to achieve this, and at a more competitive price than the customer was currently paying.

### Advantages of Solution

The customer is happy having a local instead of off-shore supplier, and financially are saving substantial funds through Custom Fluidpower's solution.
