# SMART SOLUTIONS FOR DEMANDING APPLICATIONS

**SUN** hydraulics®

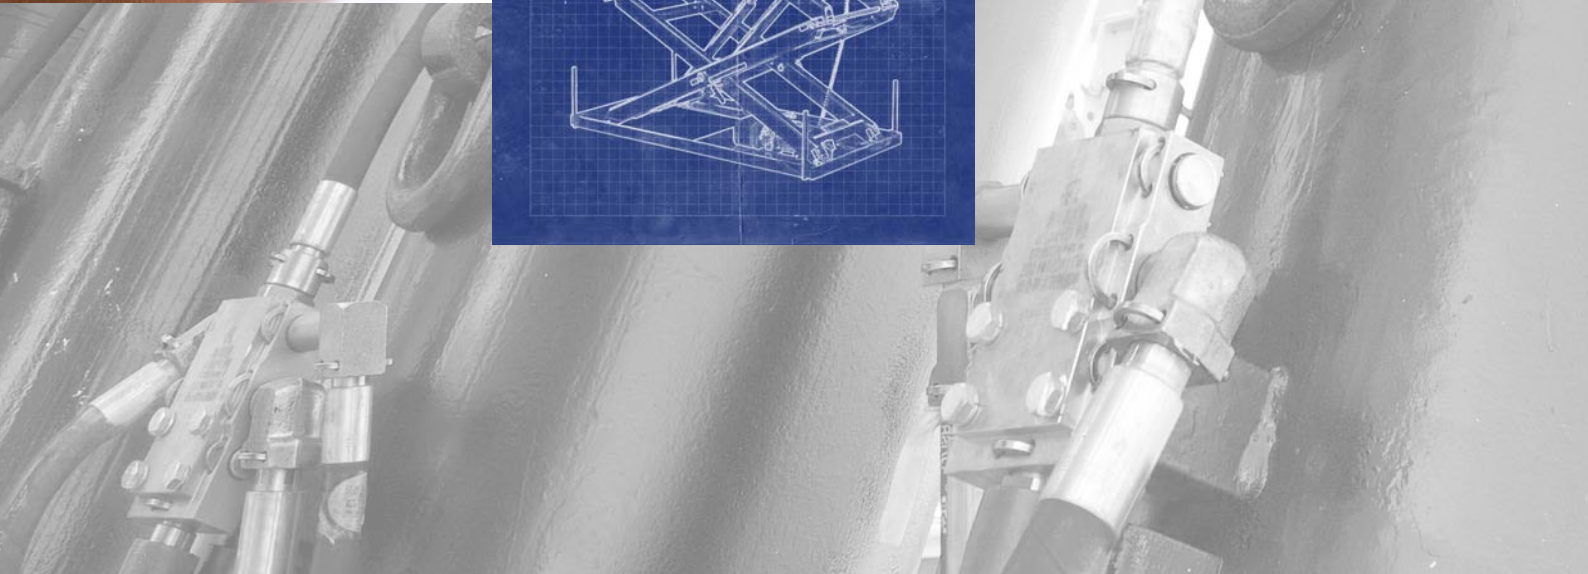

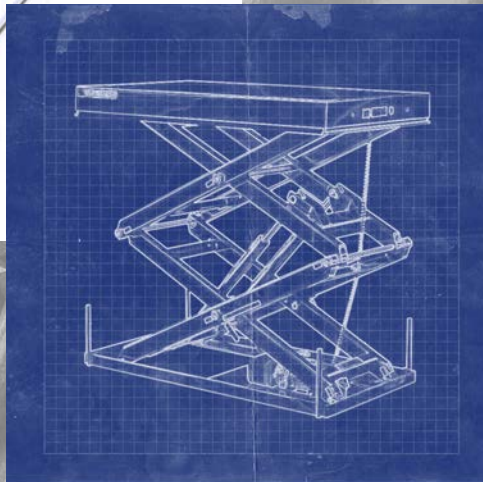

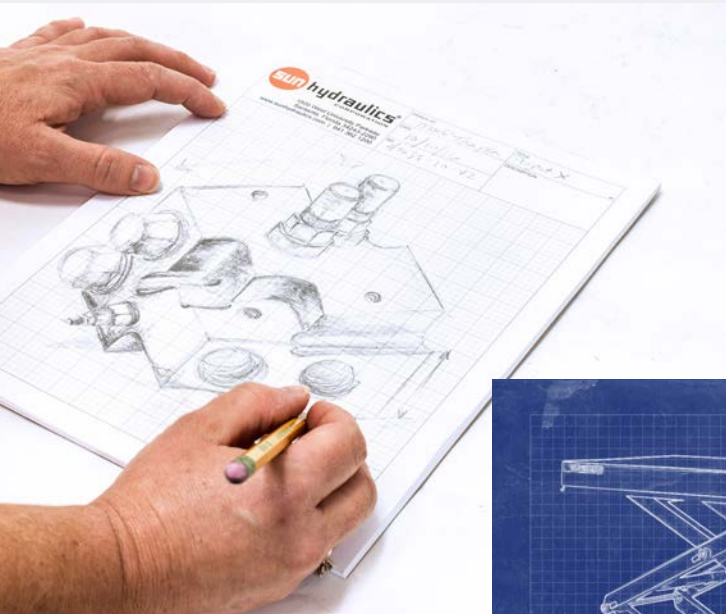

**CUSTOM**®  
fluid power

# Take your next great idea...

## If you can imagine it, we'll help you build it

Custom Fluidpower has what you need to turn your next concept into reality. We offer world-class design and manufacturing resources, and we build solutions with high-quality, products and processes. You get compact manifolds with fewer construction plugs and more efficient flow paths using industry-leading valve technology from Sun Hydraulics.

Your trusted, reliable source for cartridge valves is also your go-to resource for hydraulic solutions.

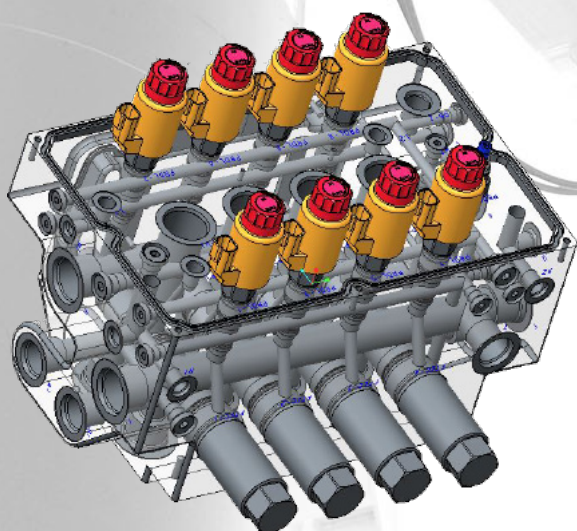

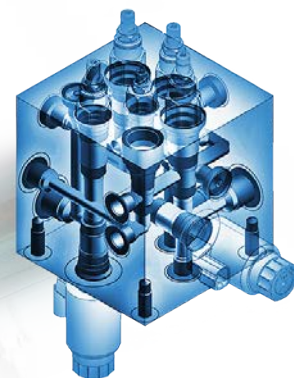

# ...turn it into a great design...

## Design it yourself

QuickDesign – Sun's free web-based automated design tool – provides drag-and-drop simplicity in a robust schematic capture tool. You get the tools you need to create an integrated package design and request a quote in a matter of minutes. It's the shortest distance from concept to solution.

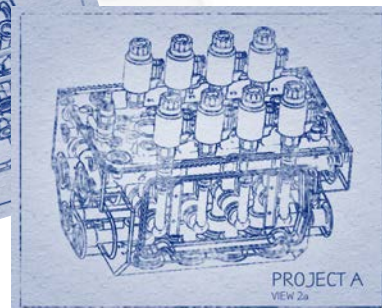

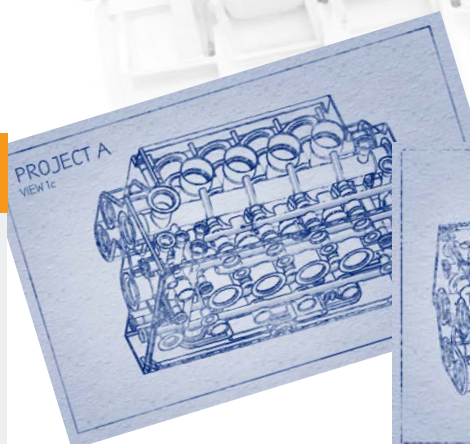

## Let us design it for you

Our global applications design engineers provide engineering assistance and design evaluation, leveraging our machining capabilities to produce optimised designs for more complex, high-volume applications. Working with our engineers, you can get even more from your integrated package.

## Choose an off-the-shelf solution

Sun Hydraulics also have hundreds of off-the-shelf assemblies, and integrated solutions aimed at providing efficient, effective solutions for common functions. Winch control, fan drive control, quick hitch, priority flow control and a wide range of standard manifold solutions can meet system needs with the click of a mouse. Custom Fluidpower customise any of our solutions to meet specific application requirements.

With a solid reputation of providing reliable, high-performance valves and a global network of engineering and applications specialists, Custom Fluidpower partner with Sun to address your most demanding applications and solve the most difficult of hydraulic puzzles no matter where you go. Our state-of-the-art electro-hydraulics and proven hydraulic control designs cover a huge range of needs in mobile and industrial markets.

With a solid reputation of providing reliable, high-performance valves and a global network of engineering and applications specialists, Custom Fluidpower partner with Sun to address your most demanding applications and solve the most difficult of hydraulic puzzles no matter where you go. Our state-of-the-art electro-hydraulics and proven hydraulic control designs cover a huge range of needs in mobile and industrial markets.

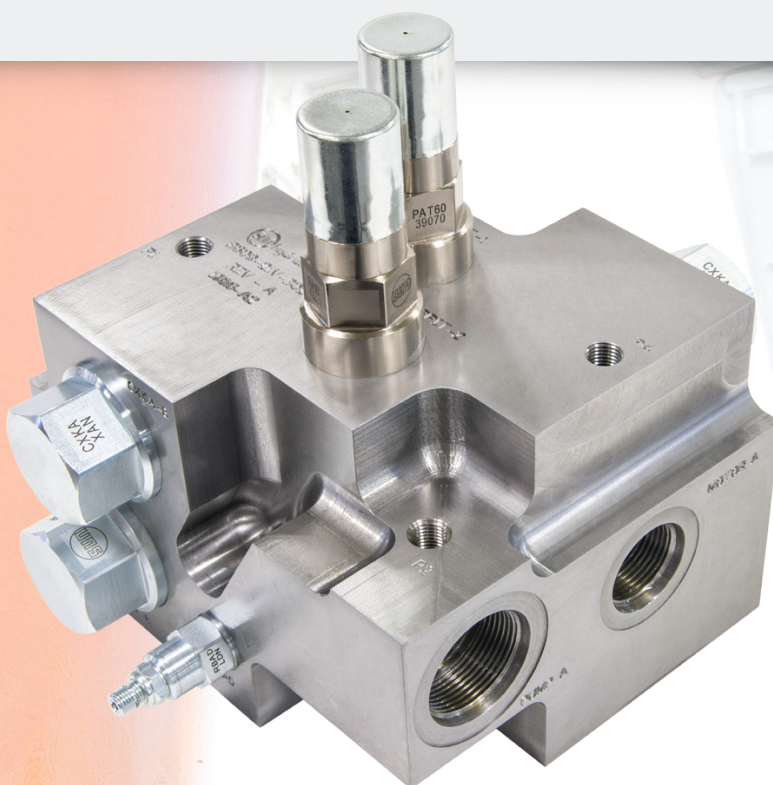

# ...and turn it into a great solution

## Finish what you started

Whether you start with a napkin sketch, a QuickDesign schematic or a fully realized design, Sun Hydraulics can help you finish what you started and turn your concept into an integrated package solution.

If you have a concept to test, a design to optimize, or a high-volume production run to move quickly out to your customers, we should talk. Our global team of application specialists can deliver smart hydraulic solutions for demanding applications in any end market.
