

## Are your Hydraulic tools and equipment up to the challenge?

### Custom Fluidpower takes hydraulic tool testing to the next level across the Hunter!

Making sure high-pressure equipment and tools are compliant has always been a challenge.

Our new Custom cutting-edge, fully certified testing trailer has redefined the benchmark in field maintenance and repairs with our in-house designed and built mobile testing unit.

***“The testing frame is certified to 120 Tonne, and is capable of testing up to 10,000 PSI”***

***“Ensures equipment safety, reliability and peak performance, with minimal downtime”***

Recognising the impact of on-site testing and repair duration on operational efficiency for any site with hydraulic equipment, our innovative engineers were tasked with designing a specialised unit.

This superior mobile unit incorporates state-of-the-art technology to facilitate a wider range of testing, tagging, servicing, and minor repairs, drawing on extensive field experience.

This enables our team to ensure your equipment safety, reliability and peak performance with minimal downtime, and is proving a great help for operators on sites using high pressure equipment across the Hunter and beyond.

### Key Features:

- Specially designed and manufactured testing frame, certified to 120 Tonne
- Capable of testing up to 10,000 PSI
- Rapid data reporting

### Key Capabilities:

- Testing and tagging
- Service
- Repairs
- Calibration
- High pressure tooling and equipment supply

***“For equipment needing major repairs, our CFP Singleton Branch is equipped with a comprehensive suite of testing, calibration and repair tools, and an extensive inventory of spare parts”.***

## About Custom Fluidpower

As Australia's leading fluid power solutions provider, we're committed to delivering tailored solutions that drive our customers' success. Our deep understanding of total engineered solutions, backed by a nationwide network with local knowledge, ensures we're always close to our customers.

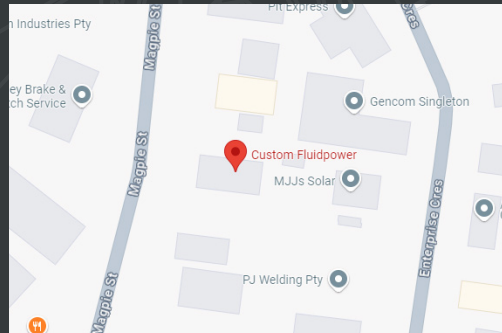

***"Pioneers in safety solutions  
for the demanding mining  
and marine environments in  
Australia".***

We are a wholly owned subsidiary of Helios Technologies. Through their global expertise, and by partnering with world-leading manufacturers, our strength is in delivering exceptional results through providing innovative and reliable products.

Our experienced team is here to keep your equipment in optimal condition, ready for the next task.

Contact the team on **02 6575 5500** for more information on the full range of services at the Singleton site.
